

CoreLynk ERP Constitution Version 1.0 – ERP Control & Validation Document

1. Business Reality
CoreLynk is a hybrid trading, manufacturing, and services ERP. Buys locally in PKR, sells internationally in USD/EUR. Supports warehousing, multi-stage production, subcontracting, and services.

2. Module Responsibilities & Boundaries
Accounting: Ledger, balances, taxes, currency, costing. Inventory: Stock quantity, location, movements only. Products: Product/service definitions only. Sales: Quotations, orders, invoices, shipping, services. Purchase: RFQs, POs, GRNs, vendor bills. Production: BOMs, stages, subcontracting.

3. Data Ownership
Stock → Inventory Cost & valuation → Accounting Balances → Accounting Exchange rates → Accounting

4. Workflow Rules
Sales: Quotation → Order → Shipment → Invoice → Accounting
Purchase: RFQ → PO → GRN → Bill → Accounting
Production: Raw → WIP → Finished Goods

5. Audit & Controls
No deletions, only reversals. Unique document numbers. Period locking. Full traceability.

6. Core Principles
Physical truth first. One owner per responsibility. Nothing deleted. Stock never lies.
